

Font Collection by Sprint Software

This font collection contains roughly 3000 TrueType fonts. The collection is contained on a CD entitled „**Super Oz Shareware Fonts**“ produced by the defunct „**Sprint Software Pty Ltd**“, run by Niall Ginsbourg (see <http://mobilewares.net/profile.aspx>).

Despite the misleading label „shareware“, this CD contains a lot of commercial fonts by Adobe, Linotype, Agfa, Monotype, URW etc. etc., often using the real typeface names („Helvetica“ etc.). This CD also contains 200 fonts by David Rakowski.

This rip-off CD by Niall Ginsbourg is similar to the „Herlitz“ rip-off CD by Susanne Kurschus (see <http://www.sanskritweb.net/forgers/herlitz.pdf>).

In order to show how the fonts of the „Sprint Software“ font collection CD were forged, I wrote a special program which dumps all internal entries of the font files. In this way a lot of additional data which are usually not seen by the user, are made visible. For instance, the fonts converted with the font converter „ALLTYPE“ contain the original font file names.

Besides the Windows TrueType fonts listed below, this „Sprint Software“ collection also contains many Adobe-Linotype rip-off fonts in Macintosh TrueType format not listed here.

Ulrich Stiehl, Heidelberg, 10-May-2005
