

Font Collections by SWFTE

The defunct font forging company **SWFTE International Ltd.** in Rockland (Delaware, USA), run by Bill Dettering in Hockessin (also in Delaware) and others, forged roughly 1,600 fonts sold as CDs, at first by SWFTE itself, then by the front company **Expert Software, Inc.** (today also defunct) in Rockland, and in recent years under the label **Fantastic Fonts**.

It should be mentioned as an irony of fate that the SWFTE font forging company forged the fonts of the Bitstream font forging company, which had forged the Linotype font collection. Strangely enough, the Bitstream font forging company (and other font outfits, e.g. Adobe) sued the SWFTE font forging company (see the court file: Bitstream, Inc., et al., v. SWFTE International Ltd., Case No. 93-11068H, District of Mass.), i.e. „forger v. forger“, so to speak, but the claims of the font forging plaintiffs were dismissed by the Massachusetts court.

Example: The original Monotype typeface **Rockwell** was cloned by Linotype. This Linotype clone was forged by Bitstream and sold as **Geometric Slab 712**, and this font was forged by SWFTE and sold as **Rockland**. Below we depict 3 fonts. Which is the original Monotype font (not the Linotype clone), which the forgery by Bitstream and which the forgery by SWFTE ?

1	abcdefghijklmnopqrstuvwxy z ABCDEFGHIJKLMN OPQRSTUVWXYZ
2	abcdefghijklmnopqrstuvwxy z ABCDEFGHIJKLMN OPQRSTUVWXYZ
3	abcdefghijklmnopqrstuvwxy z ABCDEFGHIJKLMN OPQRSTUVWXYZ

Many SWFTE forgeries are recognizable by these „swifty“ logos stored as hidden PUA characters in the Private Use Area of the forged fonts:

An Australian friend of mine told me that „**swifty**“ denotes „dodgy“, „illegal“, „deceptive“.

Ulrich Stiehl, Heidelberg, 9-May-2005
